## OBJECTIVE

I am a freshman in college for a part-time job in software development. During high school I participated in my local robotics team as a programmer, and I hope to continue applying and growing my software skills while paying college tuition.

## PROFILE

Having started coding in middle school, I have over five years of experience in amateur frontend web development. Currently I work mostly with TypeScript, Convex, React, and Tailwind CSS to create full-stack web applications. On the robotics team, I used Java to program our robot every season. During my time on the team I became skilled in collaborating with other programmers, communicating with the different subteams, coming up with simple and robust software features, and finding the most efficient paths to solving software problems. As the team's competition programmer, I am well-experienced in writing code and debugging issues as quickly as possible under pressure.

## ACHIEVEMENTS

- Participated in the FIRST Robotics Competition team in Atascadero (team 973 "The Greybots") as the competition programmer freshman through senior year and as the programming lead sophomore through senior year
- Won the Autonomous Award at the Southern California District Championship in the 2026 season with the robotics team

## WORK EXPERIENCE

### Santa Margarita KOA - Summer Groundskeeper

JUNE 2025 - AUGUST 2026

- Landscaping, maintenance, cleaning
- Managing camper events

### North County Christian School - Summer Camp Counselor

JUNE 2022 - AUGUST 2024

- Supervising campers
- Leading activities

## EDUCATION

### New Saint Andrews College, Moscow ID

AUGUST 2026 - PRESENT

Currently a freshman majoring in Liberal Arts and Culture.

### Cuesta Community College, San Luis Obispo CA

AUGUST 2024 - JUNE 2026

Took dual enrollment college courses during Junior and Senior years of high school - 4.00 GPA.

## SKILLS

### Web Development

HTML5/CSS3

Tailwind CSS

React

JavaScript

TypeScript

### Software Development

Java

Node.js

Python

C#

### Databases

Firebase

Convex

MongoDB

### Tools

Git

GitHub

VS Code

---

## PROJECTS

### Haikuatry

A website for sharing haiku.

- Site: <https://haikuatry.com>
- Repository: <https://github.com/NolanKnight/haikuatry>

### Robotics Code

Team 973's yearly code repositories.

- 2026: <https://github.com/Team973/2026-inseason>
- 2025: <https://github.com/Team973/2025-inseason>
- 2024: <https://github.com/Team973/2024-inseason>
- 2023: <https://github.com/Team973/2023-inseason>

### Bakery App

An app that tracks orders and inventory for Buttercup Bakery in Morro Bay, CA.
